Addition Word Problems

Read & Solve Real-World Addition Problems

Read each story problem. Draw pictures in the box to help you solve it, then write the addition equation.

1) Noah has 5 wooden blocks on the floor. He adds 3 more wooden blocks to his tower. How many blocks are in his tower?

Draw 5 blocks and 3 blocks here:

$$\underline{\hspace{2cm}} + \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$$

2) Chloe sees 2 butterflies in the grass. She sees 7 more butterflies flying by. How many butterflies does Chloe see in all?

Draw 2 butterflies and 7 butterflies here:

$$\underline{\hspace{2cm}} + \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$$

3) Jack has 6 blue crayons in his box. He finds 4 green crayons on the table. How many crayons does Jack have altogether?

Draw 6 crayons and 4 crayons here:

$$\underline{\hspace{2cm}} + \underline{\hspace{2cm}} = \underline{\hspace{2cm}}$$

Addition Word Problems (ANSWER KEY)

Read & Solve Real-World Addition Problems

Read each story problem. Draw pictures in the box to help you solve it, then write the addition equation.

1) Noah has 5 wooden blocks on the floor. He adds 3 more wooden blocks to his tower. How many blocks are in his tower?

Draw 5 blocks and 3 blocks here:

$$5 + 3 = 8$$

2) Chloe sees 2 butterflies in the grass. She sees 7 more butterflies flying by. How many butterflies does Chloe see in all?

Draw 2 butterflies and 7 butterflies here:

$$2 + 7 = 9$$

3) Jack has 6 blue crayons in his box. He finds 4 green crayons on the table. How many crayons does Jack have altogether?

Draw 6 crayons and 4 crayons here:

$$6 + 4 = 10$$
